1Password

Never forget any of your passwords again?

Too many passwords to remember? 1Password can create strong, unique passwords for you, remember them, and restore them, all directly into your web browser. With so many different websites and services like Banking requiring passwords and unique usernames it is safer to have different names and passwords for each site - but of course it's a nightmare to remember everything - 1Password does it all locally for you on your own computer and you can use a single password.

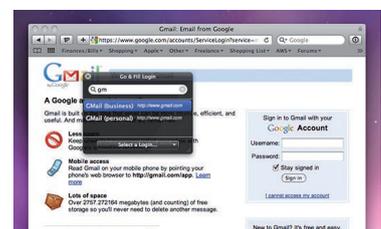

(1) Go & Fill: 1 Click, That's It. Selecting one of your saved logins from 1Password's Go & Fill menu takes you to the site, securely fills your username and password, and logs you in, all with a single click or a few keystrokes.

(2) Online Shopping Made Even Easier
 Once you've created your identities, select one in your web browser to quickly fill out a contact form. Store multiple credit cards to simplify and speed up your online shopping, filling checkout forms with ease.

Features

Never worry again!

- Your data never leaves your computer.
- Strong encryption keeps your data safe.
- Thwart keyloggers and phishing criminals.
- Save time as everything is stored in a single programme.
- 1Password is designed for your protection.

Bibble 5 Pro

RAW image management and photographic workflow at the speed of

Bibble 5 is an ambitious project to revolutionize Digital Photographic Workflow.

Complete Selective editing - apply essentially any image adjustment to the whole image, or just a portion of the image.

Bibble 5 offers some of the most advanced image editing tools available, paired with the most advanced selective editing capabilities the industry has seen. Together, these provide more freedom and better images on every frame.

Bibble 5's asset management tools make it simple to organize your photo collection whether you've been shooting for a few weeks or many years. Bibble 5 is designed for speed: importing, exporting, and on-screen adjustments happen at blazing speeds.

Features

- Import and work with all your photographic files
- Organize your photographic Library across many independent catalogs
- Search and browse multiple Catalogs simultaneously
- Browse by shooting info, metadata, ratings, tags, and color labels, and keywords
- Apply essentially any image adjustment selectively through Bibble 5's innovative Layers & Regions
- Add, Delete, Rename, and Re-order Layers & Regions in the Layer Manager
- Group many adjustments into a single Layer with many Regions
- Image Comparison View: View one or several images at a time., 'Lock' several displays together to zoom and pan

On high-end computers, Bibble 5 is eight times faster than the next closest application, and up to 80 times faster than many other applications, while still being perfectly responsive and usable on older hardware or very light-weight computers like notebooks and even netbooks.

- images to choose among similar images, or, 'Unlock' the displays to focus on different portions of different images
- Simultaneously Browse & Search one or more Catalogs using shooting info (EXIF), IPTC data, Ratings and Keywords
- Hotkey editor allowing you to assign shortcuts to your favorite functions
- Intelligent renamer works during import, export or while browsing your Library
- Includes the industry's only RAW-level plug-in interface
- Presets that can include image settings & metadata which work alone or as part of a batch import or export. Simple but powerful Preset creation and management tools.

BoinxTV

Live television studio for the Mac - Live to Disk, Internet and Stage

BoinxTV is an amazing audiovisual mixing tool for recording video podcasts, sports events, concerts, interviews, sermons, lectures, speeches, seminars and more using just your Mac and up to three cameras.

A simple and accessible user interface will allow a single person to operate BoinxTV during the recording session. Because it runs on a MacBook Pro it can be used in the field easily.

Video podcasters currently have to spend many hours editing their takes to get a professional looking result. Post-production is a time-consuming part of their workflow. BoinxTV is a game changer. BoinxTV turns your Mac into a live-production studio and can reduce your overall production time dramatically.

Features

Chroma Key

- Substitute the studio background with a movie, image or a camera input.
- Sophisticated chroma keying with green or blue screen or any other color.
- Artificial shadow suggests depth.
- Support for "Veescope Key's Softlyght keyer for BoinxTV"

Video Input

- Use QuickTime compatible video sources such as DV cameras with FireWire (sometimes called i.Link or IEEE1394), HDV cameras (if they support progressive mode), HDMI cameras (with HDMI interface card such as Blackmagic Design Intensity), iSight camera, USB webcams (if

supplied with QuickTime driver) and many more.

- Screen grabbing to include video chats (Skype, iChat) and presentation slides (PowerPoint, Keynote).
- Apply core video filters to any video source to create amazing effects.
- Play back any (unprotected) QuickTime movie.

Audio Input

- Use any audio device available in your system.
- Integrate with Soundflower and other audio routing utilities for audio interviews with Skype, iChat and others.
- Adjust volume for each layer separately.

Output

- Record directly to disk as QuickTime file.

Press

Streaming Media Magazine:

„BoinxTV - the video bargain of the year“

Monday, January 18, 2010

Sherman Schlar reviewed BoinxTV for Streaming Media magazine and compared it with existing Windows-based and hardware broadcast solutions.

The Kleper Report:

„Simply amazing and amazingly empowering“

BoinxTV Sponsored Edition

BoinxTV is an amazing audiovisual mixing tool for recording video podcasts, sports events, concerts, interviews, sermons, lectures, speeches, seminars and more using just your Mac and up to three cameras.

A simple and accessible user interface will allow a single person to operate BoinxTV during the recording session. Because it runs on a MacBook Pro it can be used in the field easily.

Video podcasters currently have to spend many hours editing their takes to get a professional looking result. Post-production is a time-consuming part of their workflow. BoinxTV is a game changer. BoinxTV turns your Mac into a live-production studio and can reduce your overall production time dramatically.

Sponsored Edition always shows Boinx spot at the beginning of the movie.

BringBackMyMac

The anti-theft software to protect your Mac

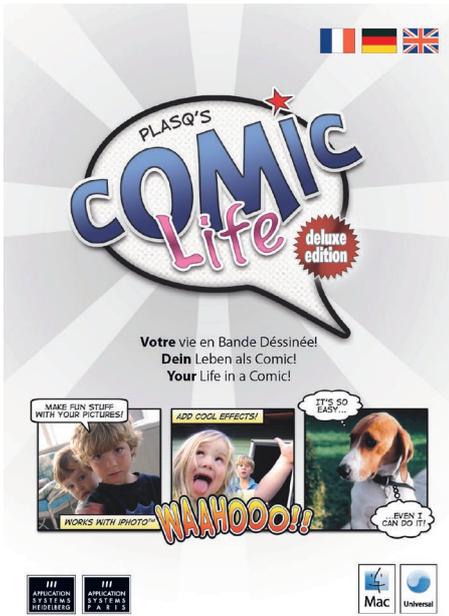

What would it mean to you if your Mac was stolen? Would you wish you had an easy way to find out where your computer ended up being? BringBackMyMac keeps track of our precious Mac Laptops with the latest technology using iSight and internet IP address to identify the thief his whereabouts! Yes, a video of him and probably where he stays when accessing the stolen Mac.

Since its introduction to the world with its video-capturing feature, BringBack-MyMac has assists many Mac owners in retrieving back their stolen or misplaced laptops! No subscription or annual fee to pay, just pay once and it is yours to keep.

The stealth program can pinpoint the location of the thief and collects vital

details to assist in the recovery of a stolen laptop!

When connected to an internet network, an authentication dialog will request the user to enter a password. If the user fails to enter the correct password within the pre-defined timing, hidden alerts (email and twitter message) and location will be sent out immediately to alert the owner.

Comic Life Deluxe

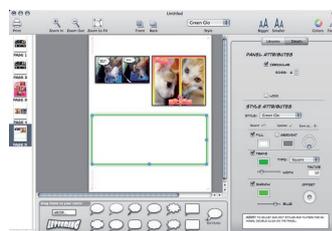

Your life becomes a comic with Comic Life Deluxe.

Comic Life Deluxe Edition is a highly acclaimed, fun, easy and powerful application that expands what you can do with your digital photos. With page and panel layouts, streamlined image selection, cropping and placement of authentic speech balloons, captions and special effects lettering - each with styles that can be saved as templates and used later on.

Comic Life offers full Integration with .Mac (including RSS feeds), iPhoto image library and exports to TIFF, GIF, JPEG, PNG, HTML, iPhoto and Quick-time formats. Taking advantage of OS X's CoreImage, the program features image effects that transform your photos into Comic Life images and more. Capture images directly from your iSight or DV Camera within Comic Life - drag and drop elegance.

Features

- Easily create Single Panel Comics by dropping an image onto a new blank comic page!
- Ability to import comics
- A single click on a page element adds an element to the center of the page
- iPhoto Events are an option when making a Quick Comic

Disclabel 6

Design and print your own CD / DVD labels and covers.

With Disclabel, you can make beautiful CD, DVD and package designs. Disclabel imports your iTunes track information right into your label design. Design and print your label while your CD is burning!

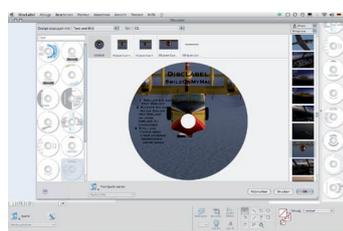

Disclabel has the most powerful track formatting tools of any labeling design program for the Mac. Browse your iPhoto library. Disclabel places the chosen picture from iPhoto into your jewel case insert design. With Disclabel, you can create a design for a disc, jewel case, booklet and more in one step.

Disclabel comes with a wide variety of templates, including professionally-designed template themes for business use.

If you've got a presentation, portfolio, annual report, or archive, Disclabel templates make a great impression. Disclabel is the best Mac LightScribe design solution! Using LightScribe Direct Disc Labeling, you can burn your label design right onto your disc. We've even got a package of specially-designed LightScribe backgrounds you can install and use with Disclabel.

Features

- Import track lists from iTunes, iPhoto, iDVD, Finder, and Toast
- Start with a pre-designed template, or create a custom design from scratch
- Print to a wide array of label and paper types (list), as well as supported direct-on-CD printers
- Import images directly from iTunes, iPhoto, Aperture, iDVD and Finder
- Apply image effects and gradients to text and objects
- Use more than 1300 clip art files via the Disclabel Clip Art Browser
- Include and edit multi-line text laid out in a circle
- Download additional templates via the Internet
- Design solution for LightScribe Direct Disc Labeling on the Mac
- Integrated with free LightScribe image package, available as a separate download

Freeway 5.5 Express

Web creation tools for the casual web designer

Web design for the design-minded. Freeway Express is the cost-effective way to get your company, group or family on the web without making sacrifices in quality.

Design freedom: Freeway Express is based on a DTP application, not an HTML editor. This means it works like any drag and drop application.

Templates: While a large number of templates are available, the best part about using Freeway Express is in starting with a blank page. Design exactly what you want without being saddled with a pre-configured website.

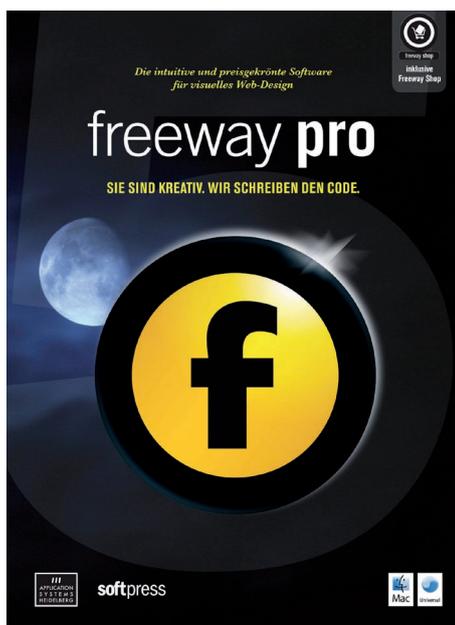

Master pages: Tired of typing/copying and pasting the same thing over and over again? Each time you create a new page, Freeway Express automatically brings your Master page content along for the ride. You just add your content!

Design for all browsers: Freeway Express writes clean, standards-compliant HTML for you that works on all modern browsers.

Rich media: Import movies, audio, and Flash into Freeway Express.

Features

- Standards-compliant HTML Generation
- WYSIWYG Editing
- Publish to a local folder
- Publish to FTP
- Publish to MobileMe
- Crop, resize, rotate images
- Built-in WebKit Preview
- One-click preview in multiple browsers
- Easily add iPhone-specific links
- Editable graphic text - create a GIF from any text
- Automatic email address obfuscation
- Master pages - create once, edit infinitely
- Save Archive - create an archive of your site for backup or transportation
- Master pages
- Import JPG, GIF, PNG files
- Table Layout

Freeway 5.5 Pro

Web creation for those who don't see the world as code

Freeway's unique approach to web design means that you can concentrate on design and leave the code writing, graphics optimization and link maintenance to the application.

Visual design: Freeway is a visual design tool that allows you to express yourself visually and without restraint while knowing that when you publish your site the application will create the perfect code for your pages. Knowing this gives users the creative freedom to explore, take risks and try out concepts that would normally be too tricky or costly to experiment with.

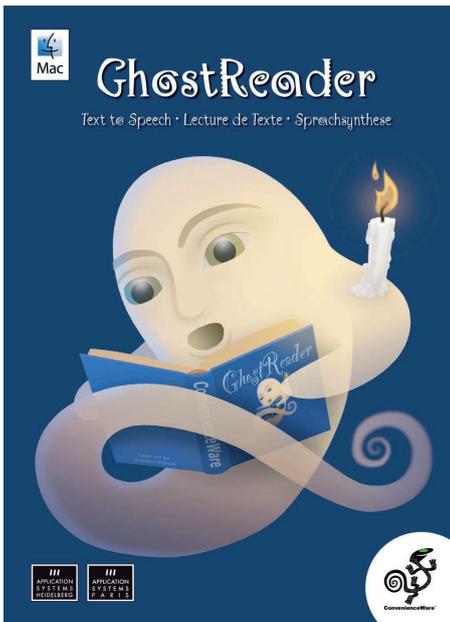

Freeway comes packed with powerful tools that let you express your creative dreams without getting in the way. Freeway's powerful plug-in actions allow you to automate and extend

the application in an almost limitless fashion.

Want to add a shopping cart? Simply drop one of the supplied Freeway Shop actions on your page, enter a few product and store details and you are on your way to setting up shop!

Features

- Standards-compliant HTML Generation
- WYSIWYG Editing
- Publish to a local folder
- Publish to FTP
- Publish to MobileMe
- Crop, resize, rotate images
- Built-in WebKit Preview
- One-click preview in multiple browsers

- Save Archive - create an archive of your site for backup or transportation
- Master pages
- Import JPG, GIF, PNG files
- Native import of PSD, TIFF, AI, EPS & more
- Table Layout
- CSS-based layout
- The ability to create and install extra functionality through Actions
- Multiple output options (HTML 3.2, HTML 4.01, XHTML Transitional and Strict)
- Full choice of output encodings
- Complete color and text style management across your entire document
- Accessibility reporting
- Employ multiple style sheets for each document
- Full CSS text styling
- Ability to specify relative and percentage positions and dimensions for layout items

GhostReader monolingual

The premier Text-to-Speech solution for the Mac

With GhostReader you listen while your Mac does the talking. GhostReader is a multilingual text to speech solution for Mac OS X that allows you to listen to your documents with naturally sounding voices in a language of choice. Use it to create your own personal podcasts or your own audio books by exporting to iPod-ready iTunes tracks. Or, select text in almost any application and let GhostReader read the selection for you in a handy reader window with play, fast forward and rewind functionality. Sit back and relax while GhostReader reads for you.

iStopMotion 2 Express

Stop Motion Animation for the semi Pro.

iStopMotion Express is Stop Motion Animation for the animation aficionado, who spends a lot of time creating animations and wants all the features of the Pro version except those only needed in a professional production environment.

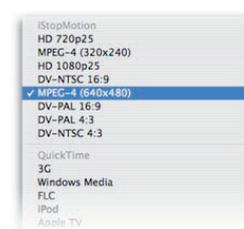

Features

Workflow

iStopMotion 2 introduces a variety of new workflows to give animators the ability to fully concentrate on animating.

- Workflow based on convenient presets that keep the complexity from the user.
- Ships with common presets that cover most needs.
- Power users can customize all details to their needs.
- Presets also include export and playback settings.
- User can create own document presets, to have presets that fit their special needs.
- Express/Pro: Playback movies are now rendered in background, so you don't have to wait long when pressing play.

- Saving is now instantaneous as images are captured directly into the right movie.
- Option to auto-save your work, so you never lose any frames should the software crash.
- An iStopMotion project is a fully compatible QuickTime movie, so it can be used directly by other applications.
- Convenient export based on presets.
- Full aspect ratio support for documents and video sources, based on presets.
- Support for frame-based count in addition to timecode display.
- Additional time code window
- Time Lapse Recording
- Capture a single frame or a sequence of frames at predefined intervals.

iStopMotion 2 Home

Stop Motion Animation for you and me.

iStopMotion Home is Stop Motion Animation for the casual user, the typical family where the parents want to have fun with the kids while providing them with a productive, creative and educational experience.

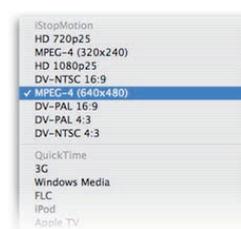

Features

Workflow

iStopMotion 2 introduces a variety of new workflows to give animators the ability to fully concentrate on animating.

- Workflow based on convenient presets that keep the complexity from the user.
- Ships with common presets that cover most needs.
- Power users can customize all details to their needs.
- Presets also include export and playback settings.
- User can create own document presets, to have presets that fit their special needs.
- Saving is now instantaneous as images are captured directly into the right movie.

- Option to auto-save your work, so you never lose any frames should the software crash.
- An iStopMotion project is a fully compatible QuickTime movie, so it can be used directly by other applications.
- Convenient export based on presets.
- Full aspect ratio support for documents and video sources, based on presets.
- Support for frame-based count in addition to timecode display.
- Additional time code window
- Time Lapse Recording
- Capture a single frame or a sequence of frames at predefined intervals.
- You can now time-lapse a scene with an interval smaller than one second (depends on video resolution and hardware speed).

Lineform

Lineform - Ideal tool for vector based diagrams and illustrations

Easy and affordable vector drawing!
 Fast, lean and Universal, Lineform offers powerful features in an uncluttered interface that's designed to help you get work done!
 Winner of a 2006 Apple Design Award, Lineform is the ideal Mac app for vector-based diagrams and illustrations. Useful features combine with a simple interface to create a wonderfully intuitive artistic process. Lineform has all of the most popular tools, including everything from freeform gradients to compositing effects, enabling you to create the designs you want without getting in your way with „features“ you don't need.

MacJournal

Diary, blog or podcast? - MacJournal is the solution.

MacJournal 5 organizes all your information and helps chronicle your life fast and easy. MacJournal 5 allows users to add any kind of content, PDFs, QuickTime movies, audio, images, and text. Assign each entry a rating, status, and priority, and sort any journal by those values. If blogging is more your style, MacJournal lets you publish your work as a blog to any of the popular blogging services.

Features

- Online blogs supporting LiveJournal, Blogger, Movable Type, WordPress, .mac (including .mac syncing), and more.
- 2-D Quartz rendering for graphically rich journals.
- Nested, multiple journals and Keywords efficiently organizing your entries. Have one for your work log, and have another for your personal journal.
- Export your data to Microsoft Word, RTF, HTML, and more.
- Entries can have multiple colors, fonts, kerning, spacing; really anything you want.
- Powerful searching capabilities including Smart Journals to search all of the entries in all of your journals with one click.
- Print any entry to a printer or PDF file.
- Mac OS X Toolbar functions in the customizable toolbar.
- Spellcheck while composing entries.
- MacJournal backs up any and all activity within the product.
- Password protection and AES-256 encryption providing maximum strength security.
- Rich Text Editing where individual entries can have multiple colors, fonts, kerning, spacing; really anything you want. In addition, you can now drag image files into entries! Rulers further help you to align things.

Montage

Productive development of scripts for film and television.

The only screenwriting software exclusively developed for Mac OS X. Melding the theory that a simple user interface, combined with powerful and intuitive features, provide the best writing experience, Montage makes it easy to create, edit, and manage screenplays on your Macintosh. From the ability to import and export Final Draft documents, to using custom, pre-formatted templates for film, TV, and theater, Montage guides both the first time screenwriter or the seasoned veteran, from start to finish.

Features

- Import and Export Final Draft documents, text, or RTF.
- .sex file format support.
- Scene Numbering.
- MobileMe integration.
- Includes templates for Film, TV, BBC, Theater, and more.
- Create your script as a live outline.
- Montage Smart Views allow writers to visually filter the script to the desired content, based on criteria.
- Submit your query, synopsis, and scripts to hundreds of included industry contacts.
- Write, distraction-free, in Full-Screen mode.
- Print any entry to a printer or PDF file.
- Mac OS X Toolbar functions are available as items in the customizable toolbar in the main window.
- Spellcheck on the fly.
- Montage backs up any and all activity within the product.
- Native Cocoa, Universal, and Accessible.
- Complimentary support to help solve questions or issues.

Paragon NTFS 8 for Mac OS X

Mac OS can now read AND write to NTFS partitions

When working with media files or documents in Mac, you need access to the high performance of your system regardless if the files are located on the Mac's HFS+ formatted volume, or in Window's NT File System. Paragon NTFS for Mac® OS X 8.0 is the only NTFS driver on the market that provides full read/write access to NTFS with the same high speed as native HFS+ files. The built-in "HFS+ for Windows" completes an effective two-way communication channel between Mac® OS X and Windows.

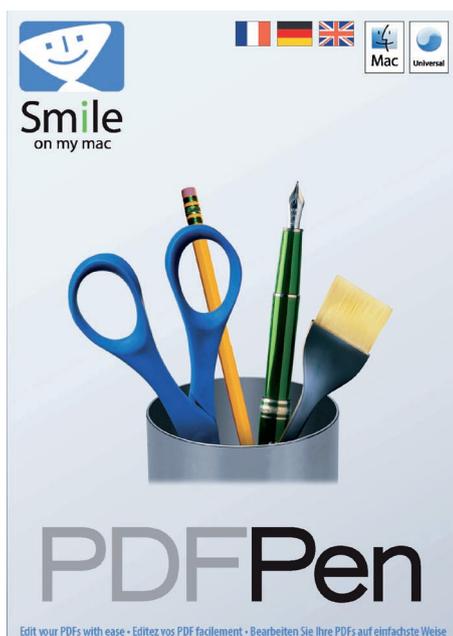

NTFS for Mac® OS X 8.0 is the first NTFS driver to support Snow Leopard in 32 and 64-bit mode!

Features

You can use both - Mac® and Windows to access all files:

- With Paragon's brand new Mac-Browser you get fast, easy and transparent read/write access to Mac®-disks from your Windows operating system.
- Completely and instantly access all Windows files and folders with your Mac®.
- Easy, safe installation and usage on Mac® or Windows.
- Unhampered data exchange between PC and Mac®.
- Share Windows files as a Mac® user via external disk drives.
- Get access to Windows video files on your Mac® to cut and post-produce them.

- Get access to .doc- and .pdf-files on your Mac®.
- Make any version of NTFS a native file system for Mac® OS X - no restrictions, full support!

PDFpen

Fill forms, markup, and augment PDFs

NEED TO MAKE CORRECTIONS IN ORIGINAL PDF TEXT?

Just select the text you want to change and click „Correct Text“ - PDFpen replaces the original text with an editable text box.

NEED TO SIGN THAT ELECTRONIC FAX? Open the fax in PDFpen and scribble your signature with the mouse or drag in a scanned signature image. Scale it to sign on the dotted line. Return it via email, or use PageSender for a paperless turnaround fax solution.

NEED TO EDIT A SCANNED ORIGINAL? PDFpen can perform basic OCR (Optical Character Recognition) on your scanned document to make the text editable.

NEED TO MERGE PAGES FROM SEVERAL PDF FILES TOGETHER?

Open the files in PDFpen and drag the pages you need from each into a new document

NEED TO CUT A PDF DOCUMENT DOWN TO SIZE?

Open a copy in PDFpen, select the pages to remove, hit delete, and save. It's that easy.

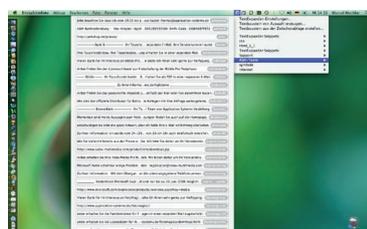

NEED TO REPURPOSE PDF CONTENT? Now you can search, select and copy the text of PDF documents.

NEED TO APPLY A CUSTOM STAMP TO YOUR PDF DOCUMENTS?

PDFpen is fully scriptable, so you can automate nearly anything you can do in the interface.

Features

- With PDFpen, you can edit PDF files, including:
- Add text, images and signatures to PDF
- Correct text in original PDF with editable text blocks
- Move, resize, copy and delete images in original PDF
- Perform basic OCR (Optical Character Recognition) on scanned documents
- Insert and remove pages; re-order pages in a PDF by drag & drop; combine PDFs
- Fill out and save PDF forms
- Copy and paste rich text; retain fonts and formatting when copying from PDFs
- Select and copy text across multiple columns
- Add (and print) notes and comments
- Markup documents with highlighting, underscoring and strike-through
- Save frequently-used images, signatures, objects and text in the Library
- Use with PageSender for a paperless fax turnaround solution
- Automate PDF manipulations with AppleScript

Snowtape

Listen and record live internet radio with the touch of one button.

Snowtape is the perfect solution for you if you like music and want to have a lot of it in your pocket. In just 10 hours your music library will contain over 150 songs and by the end of the week your iPod shuffle is already packed with your favorite music. Hit the record button while listening to your favorite station and recording starts instantly. Snowtape is able to cut the recordings at audio track boundaries automatically and puts every track separately into your database, if a radio station is transmitting correct stream titles. Snowtape is able to identify potential commercials for automatic removal.

The integrated track editor let's you preview the track as well as trim at the beginning and at the end.

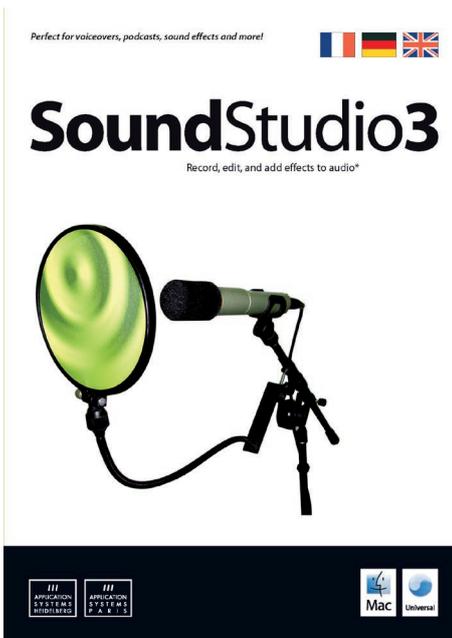

Click the „Export to iTunes“ button to export AAC audio right into your iTunes including Album artwork and track titles. Windows Media technology integrated right into Snowtape. It just works out of the box.

Features

- Online Directory
- Scrobble to Last.fm
- Manage Lists & Smart Lists
- Built-in Audio Editor
- Zero-Reencoding Process
- Background Recording
- AirTunes
- Splits Track Boundaries
- 1-Click Export to iTunes
- Audio Fingerprint Lookup
- Recording Schedules
- Browser Integration
- Filters Commercials
- Batch Export Multiple Tracks
- Fade-In & Out Recordings
- Windows Media Support
- Gorgeous Mini Controller
- Find Album Artwork
- Export AAC or MP3
- Apple Remote Support

Sound Studio

Sound Studio - Recording and editing audio digitally on your computer

The essential tool for working with digital audio!
 Sound Studio 3 is an easy-to-use Mac OS X application for recording and editing digital audio on your computer. Digitize tapes and vinyl records, record live performances, create your own mixes with crossfades, tweak the levels and EQ, apply digital effects and save in all major file formats with Sound Studio 3!

The Mac's most popular audio program for many years, Sound Studio continues to be regularly updated to add new features and to take advantage of the very latest Apple technologies. Perfect for Podcasts, Music & More!
 With Sound Studio 3 you can record professional sounding Podcasts and other audio dialog. Check out the article on Suggested Recording Hard-

ware to find out more about how to mic properly and other useful audio information.

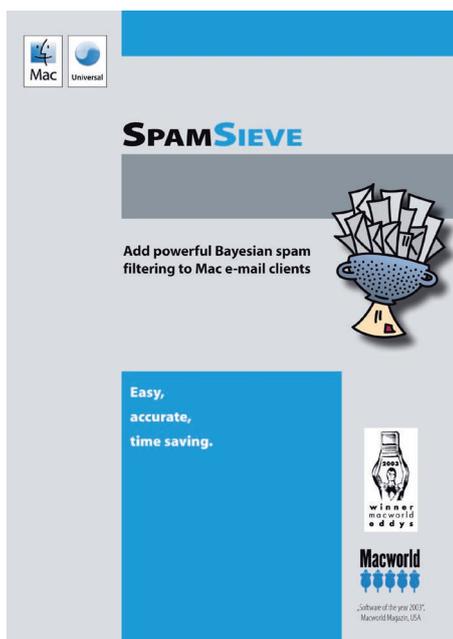

Positioned perfectly between more expensive programs with steep learning curves and far less robust apps, Sound Studio is for anyone who needs to record or edit audio with a professional tool, but at a consumer price!

Features

- Take advantage of your Mac's built-in audio capabilities.
- Record and edit digital audio in 32-bit floating point accuracy, at any sample rate (hardware permitting).
- Layer sounds with multiple tracks.
- Apply any of 24 built-in effects filters
- Use any Core Audio plug-in Audio Unit effect.
- Open and save in MP3, AAC, AIFF, WAV, and other popular file formats. (Saving in MP3 requires a free external framework.)
- Create podcasts with chapter markers in AAC format.
- Edit iTunes song metadata and ID3 tags.
- Connects to any standard USB audio device or other Core Audio device.

- Batch process files using Automator or AppleScript.

SpamSieve

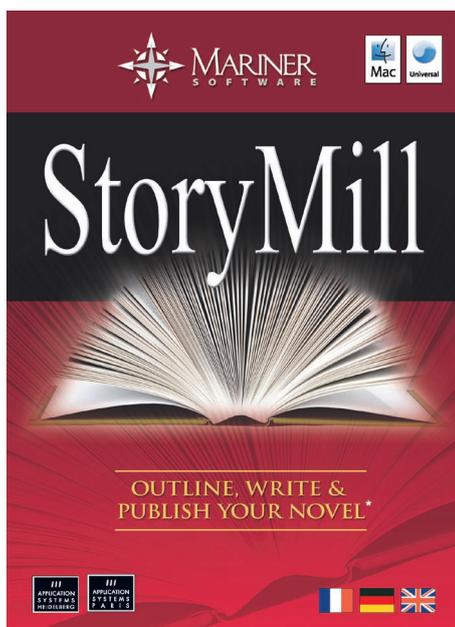

Powerful Bayesian spam filtering for your Mac e-mail client

What Is SpamSieve?

SpamSieve gives you back your inbox by bringing powerful Bayesian spam filtering to Mac e-mail clients. It's quick and easy to control SpamSieve from within your mail client, and you can customize how it interacts with the rest of your message sorting rules. Other spam filters get worse over time as spammers adapt to their rules; SpamSieve actually gets better over time as it adapts to your mail. By learning from the very messages that you receive, SpamSieve is able to block nearly all of your junk mail, without putting your good messages in the spam mailbox.

Features

- Powerful Bayesian spam filtering results in high accuracy and almost no false positives. It adapts to the mail that you receive to get even better with time. Some other e-mail clients include Bayesian filters, but SpamSieve is more accurate.
- Integrates with your e-mail client for a superior user experience. Plus, you get the same great filtering if you ever switch e-mail clients or use more than one at a time.
- Integrates with the Mac OS X Address Book (and also Eudora's and Entourage's address books) so that messages from friends and colleagues are never marked as spam.
- Automatically maintains a blocklist so that it can instantly adapt to spam messages sent from particular addresses, and catch 100% of them.
- Automatically maintains a whitelist to guarantee that messages from particular senders or mailing lists are never marked as spam, without cluttering your address book with these addresses.
- You can customize the whitelist and blocklist, adding sophisticated rules that match various message headers, or the message body. The rules can match text in a variety of ways, including using regular expressions.
- Can use the Habeas Safelist, which indicates messages that are not spam, as well as the "ADV" subject tag indicating that a message is spam.

TextExpander

Abbreviate and expand things you type.

New! TextExpander 3 with easier snippet creation, editing and search tools! Save time and effort with TextExpander! Whether it's a simple email signature or several paragraphs of a standard response, you'll love how easy it is to use TextExpander to avoid typing the same thing over and over.

USE DIFFERENT EMAIL SIGNATURES?
 Easily insert a customized signature with a few keystrokes. You can even include a photo or logo!

NEED EASY ACCESS TO BOILERPLATE PARAGRAPHS?
 Add them to your snippet library and insert them into your emails and contracts by typing a short abbreviation.

FILLING OUT FORMS?
 Make it easy on yourself by adding your address, email, phone and fax numbers to your snippet library.

Features

- Save thousands of keystrokes by using short abbreviations to insert „snippets“ containing frequently-used phrases and images
- Insert standard greetings and signatures -- including formatted text and pictures
- Assign hotkeys to save even more time when creating, editing and searching your snippets.
- Reposition the cursor in the expanded snippet, or use our new fill-in-the-blank snippets to enter variable data in multiple fields.
- Organize snippets into groups
- Add snippet groups from external files and online sources
- Sync snippets via MobileMe or Dropbox

KEEP MAKING THE SAME TYPOS?
 Add common typos as triggers - TextExpander automatically replaces them with the correct spelling! TextExpander also includes the TidBITS AutoCorrect Dictionary.

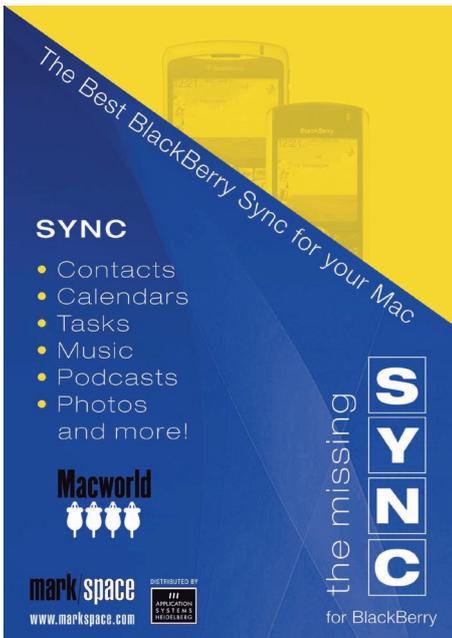

WANT TO INSERT HTML AND CSS CODE QUICKLY?
 Create abbreviations for commonly-used tags! Or use our built-in HTML and CSS snippet groups.

NEED TO INSERT THE CURRENT DATE OR TIME?
 TextExpander comes with date and time snippets that you can format the way you want.

USE SPECIAL CHARACTERS OR ACCENTED WORDS?
 Try our built-in snippet groups to insert special characters and accent marks easily.

- Insert the current date and time in any format you prefer
- Add common typos to your snippet library--TextExpander will automatically correct them for you! (more info)
- Type special characters without having to launch a special characters palette
- Trigger snippet expansions automatically by typing the abbreviations you specify, or use any one of over 30 delimiter characters as a trigger
- Position the cursor wherever you want in your expanded snippet
- Programmers: make editor-independent code templates; invoke AppleScripts and shell scripts

The Missing Sync for BlackBerry

The Missing Sync, BlackBerry Mac

BlackBerry mobile phones offer a wonderful level of freedom - from the office and from your computer - to let stay in touch and do all you need to do, wherever you go. With The Missing Sync, you are free from cables too. Sync automatically and wirelessly via Bluetooth with Proximity Sync™ technology. Whenever your phone is near your Mac, sync happens - even when your BlackBerry is in your pants pocket or bag. Contacts and calendars are kept in sync. Photos and notes are transferred from your phone to your computer. Its syncing without thinking - automatic, without wires, and hassle-free.

The Missing Sync for iPhone

The Missing Sync, iPhone, Mac and Windows

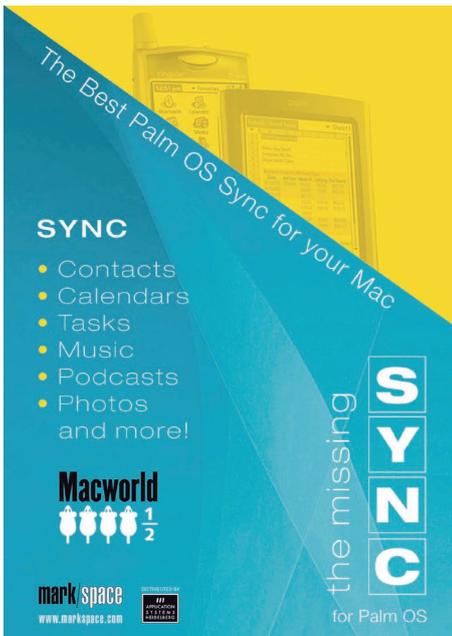

Sync notes, tasks, documents and files between your iPhone and Mac. Create ringtones from your favorite tunes. Save iPhone voicemail, text messages and voice notes to your Mac. Get the most from all the features of your iPhone. The Missing Sync for iPhone is designed as a companion to iTunes, offering additional sync features to what iTunes provides.

Features

- Sync Documents, Files, Notes and Tasks
 Edit a note on your iPhone and sync it to your Mac. Add a task in iCal and sync it to your iPhone. Create a new doc on the Mac and sync it to your iPhone. The Missing Sync recognizes changes and synchronizes them between your Mac and iPhone via Wi-Fi.
- The Missing Sync works hand-in-hand with the free iPhone apps - Fliq Notes, Fliq Docs and Fliq Tasks. Sync your notes, documents and to dos and keep them updated and synchronized between your iPhone or iPod touch and Mac.
- Save Voicemail, Text Messages, Recent Call History and Voice Memos

Save your favorite and noteworthy iPhone voice messages to the Mac to listen to later - entertaining messages from the kids, birthday wishes, congratulations, etc. Bring voice memos you record on your iPhone to your Mac: journal entries, reminders, phone numbers and addresses.

- Archive text messages and recent call history to your Mac where they can be viewed, searched and sorted. Export a CSV file to use in other documents, like Excel, too.

The Missing Sync for Sony PSP

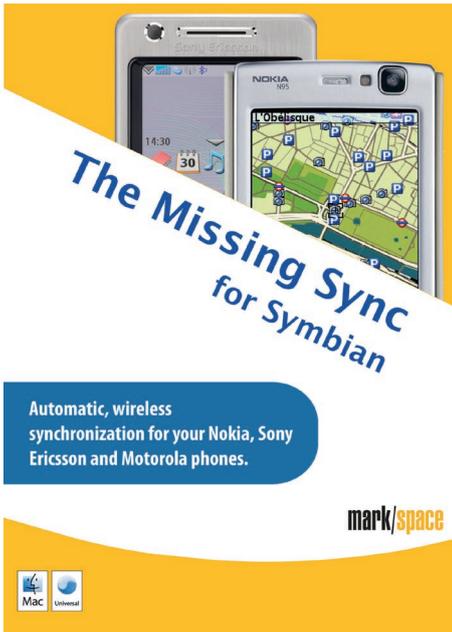

The Missing Sync, Sony PSP, Mac

The Missing Sync is the best way to connect your PSP and PSP Go to your Mac. Back up saved games. Transfer music, podcasts and video to your PSP. Download web sites and bookmarks to view. Take your important info with you, like contacts, notes, tasks and calendar. Easily. Automatically. With style.

Features

- Backup your Saved Games and Memory Sticks
 Don't lose your place in an RPG, a high score in a platformer, or your settings for a shooter. Backup Saved Games to your Mac with The Missing Sync. Plus, backup all the files, downloaded games and other stuff on your Memory Sticks, too. Use The Missing Sync to keep copies of all your game stuff on your Mac - just in case.
- Transfer videos to your PSP
 The Missing Sync encodes movie previews and YouTube videos for optimized viewing on your PSP. It also acts as a video library, keeping track of what's on your Mac and what's on your PSP. Track multiple Memory Sticks independently and keep different content on each stick. Always

- have video queued up and ready to go on your PSP.
- Take your tunes with you
 Sync your iTunes playlists of music from your Mac to your PSP with The Missing Sync.* Its like Media Go for the Mac. With The Missing Sync, your PSP becomes your portable music player. Always have your music with you wherever you go!
- Sync iPhoto albums
 Sync photos from one or more iPhoto albums to your PSP. Forget manually copying them to a Memory Stick. Just plug in the PSP and click the sync button. The Missing Sync will send your photos across automatically, sized to fit the screen of your PSP.

The Missing Sync for Symbian

The Missing Sync, Symbian, Mac

Wirelessly synchronize information and files between your Mac and Nokia, Sony Ericsson or Samsung Symbian OS handset - contacts, calendars, tasks, plus your favorite music, photos, videos and documents. Your information stays in sync between Address Book, Microsoft Entourage, iCal and phones like the Nokia N95, Nokia E71, Sony Ericsson P1i and Samsung i520.

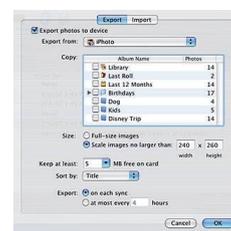

Features

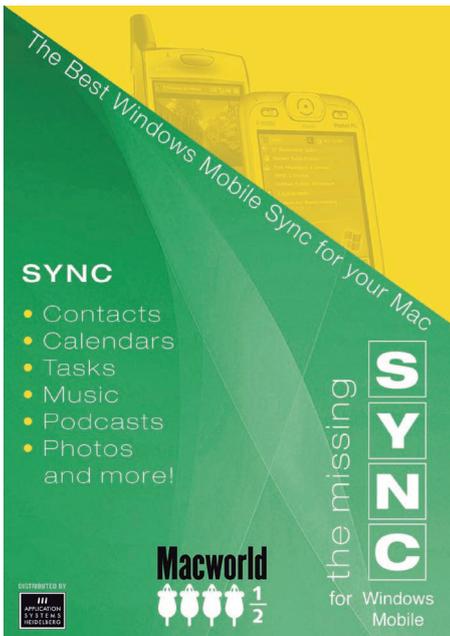

- Wirelessly synchronize: contacts, calendars and tasks
- Connect your phone with Mac OS X and synchronize contacts, calendars and tasks with iCal, Address Book, Microsoft Entourage or Market Circle Daylite. Don't worry about missing a meeting or forgetting an important task. With The Missing Sync, easily take your schedule and todo list with you wherever you go.
- Automatically synchronize your phone with your Mac:
- The Missing Sync for Symbian uses Mark/Space Proximity Sync™ technology. This new approach to synchronization uses Bluetooth to sync data automatically when your Mac and phone are close to each other. The Missing Sync keeps your vital infor-

mation the same on your phone and your Mac -- always.

- Synchronize your favorite music, videos, photos and files:

The Missing Sync works with iPhoto and iTunes so you can enjoy your favorite music, photos and videos on your phone. For example, the Missing Sync downloads iPhoto albums to your phone and resizes each picture to fit the screen. Import video and pictures you take with your mobile phone's camera into iPhoto, easily. And, synchronize documents so they can be viewed and edited with handheld applications such as Quickoffice or Adobe Reader LE.

The Missing Sync for Windows Mobile

The Missing Sync, Windows Mobile, Mac

Connect your phone to your Mac and get the most from all its features. The Missing Sync works with phones running the Windows Mobile OS, like the HTC Touch, Samsung Omnia and Palm Treo Pro - including new phones running Windows Mobile 6.5. You'll always have your contacts, notes and most current calendar on your phone and your Mac. Enjoy music, podcasts and video on-the-go. Transfer and save photos to and from your phone. The Missing Sync does all this and much more.

The Missing Sync is a snap to install, setup and use. In a few simple steps, the Setup Assistant guides you in setting up The Missing Sync to sync your phone with your Mac. The Missing Sync for Windows Mobile is the most reliable solution to keep

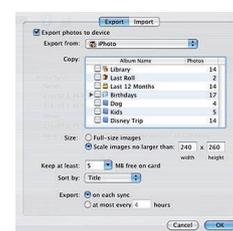

your phone and Mac in sync. Through the years, awards and accolades confirm The Missing Sync for Windows Mobile as the best way to link your phone and Mac, keeping them in sync, and making them both better - together!

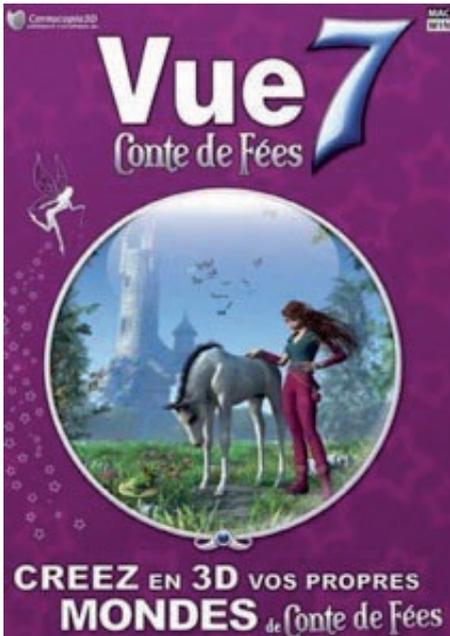

Features

- **Contacts**
Sync your phone with Address Book and Microsoft Entourage. Add a new contact. Update an address. The Missing Sync keeps contacts in sync between your phone and Mac.
- **Calendars and Tasks**
Keep your calendars and to-dos in sync between your phone and iCal or Entourage. You'll always know where your supposed to be and what you're supposed to do, wherever you go!
- **Files and Documents**
You can transfer Word and Excel files between your Mac and Windows Mobile phone. PDF Files too. Edit Microsoft files on your WinMo device and sync the updated documents to your Mac.
- **Music, Photos and Video**

Transfer music playlists and photo albums from iTunes1 and iPhoto. Save pictures you snap with your phone to your Mac too. Transfer video optimized to view on your phone.

- **Notes and Memos**
Easily sync notes and memos between your phone and Microsoft Entourage, Bare Bones Yojimbo or Mark/Space Notebook. Your notes are always with you.
- **Ready. Sync. Go!**
The Missing Sync for Windows Mobile gives you the choice of syncing via Bluetooth or USB. Palm, HTC, Samsung, Motorola and others. The Missing Sync can sync them all!

WinJournal

Diary, blog or podcast? - WinJournal is the solution.

Effortlessly organize and record your thoughts and daily events with this journal software. Publish entries to your favorite blog site or keep secure on your PC. Even podcast with WinJournal - the all-in-one blog client! Chronicle life's moments for your grandchildren, your children, or yourself! Look back years from now to recall what you were involved with today. Add photos, links, audio, graphics, or just words. WinJournal's journal software will archive your entries, keeping them safe and secure.

Let's face it, the Internet makes communication incredibly easy. Blogging, or publishing and maintaining a journal on the Internet, is the latest form of expressing yourself. Communicate with family and friends or step up onto your own personal soapbox; WinJournal

makes blogging a snap. Then again, if you're more the private type and want to keep your writing on your hard drive, WinJournal gives you two levels of security: Password protection and AES-256 encryption.

Features

- Publish to blog - Publish your blog in two clicks!
- Podcast - Share audio with listeners who subscribe to your podcast via RSS.
- Full screen - A simple key combination brings you into distraction-free mode.
- Search - Search for any word, in any entry, in any journal.
- Statistics - Show a list of the most common words, total characters, average words per entry.
- View blog in browser - Use your browser to view your blog.
- Insert song info - Automatically add the name and artist of the WinAmp song you're listening to.
- Discover Wiki Links - Find links between your journals and entries.
- Journals pane - Create and organize all your journals hierarchically.
- Online blogs supporting LiveJournal, Blogger, Movable Type, WordPress, and more.
- 2-D rendering technology making graphically rich journals.
- Nested, multiple journals and Entry Keywords efficiently organizing your entries. Have one for your work log, and have another for your personal journal.
- Password protection and AES-256 encryption providing maximum strength security.
- Multiple file formats, exporting your data to Microsoft Word, RTF, HTML, and more.
