

Release Notes: Mindjet MindManager Version 9 for Mac

Version 9.5.416

June 7, 2012

Highlights

Industry-leading Information Visualization

Capture, organize and work with ideas and information in a wide variety of interactive visual formats including information maps, outlines, organization charts, tree diagrams and more.

Project Planning and Task Management

Streamline the project planning process and ensure visibility into all aspects of a project. Easily gather requirements and gain stakeholder buy-in on strategies, schedules and more. Assign and track priorities, resources and schedules to ensure project details stay on schedule.

Capture Content and Add Context

Easily capture stakeholder input, draw connections and reorder content. Use icons, tags, topic shapes, callouts, boundaries, colors, topic sorting and numbering to provide additional context. Add hyperlinks, attachments, notes and images to provide additional levels of details.

Information Map Presentations

Communicate effectively to multiple audiences with MindManager's interactive slide presentations. Easily tailor the level of details presented for each audience and capture critical feedback right in the presentation.

Integration and Sharing

Save time with powerful integrations. Import from Microsoft® Word®, Apple® iWork® Pages and FreeMind. Export to Word, Pages or Keynote® for your final output. Integrate with iChat® to send or receive maps during a chat session. And share your maps via email, as web pages, images or dynamic PDF files.

Dynamic Content

Synchronize your relevant calendar items and contacts with MindManager with dynamic Microsoft® Entourage and Apple iCal® and Address Book dashboards. Bring the Internet into the map with a built-in web browser for in-context search and research results.

Navigation, Viewing and Printing Controls

Navigate and control the levels of details displayed with powerful features like topic focus, show or hide branch, collapse map, quick filter and select, and more. Automatically fit or balance your map within the screen. Use WYSIWYG printing of entire maps or selected sections

Lion 10.7 OS X Certified

MindManager Version 9 for Mac is fully compatible with Lion 10.7 OS X, in addition to Snow Leopard 10.6 OS X.

Features

Mindjet Connect Integration

- Improve team dynamics by increasing project management transparency, accountability, and productivity by sharing maps and files with other team members.
- Sign into Mindjet Connect and Share maps with team members
- Store maps and files in Mindjet Connect, you and invited team members can check them in and out to make edits
- Invite anyone to access your files and grant them read-only or edit access
- Access your maps with a browser or Mindjet's mobile apps.

Slide Presentations

- Present your work in easy to follow slides. Pick and choose topics to present, adjust their order and control exactly how you want each branch to appear.
- Display your slides in a MindManager slideshow, or export them to create a Keynote or PowerPoint presentation.

WYSIWYG Printing

- Now printing your maps is easier than ever. Choose to print the entire map or only select slides, so you can print out exactly what you need.

Improved Interface

Find exactly what you are looking for with an improved organization of menu options and enhanced user interface.

- New Map Gallery makes it easier to get started by choosing a template or resume working on an existing map.
- Formatting Toolbar – gives you access to commands for formatting and editing map elements quickly.
- Improved Inspector – Inspectors have been modified for improved usability. Open multiple Inspectors to get quick access to the options you use most.
- Improved Notes – Topic Notes can now be formatted in-context in the Notes window.

Local, Expanded Import and Export Transformations

- No longer do you need an internet connection to import or export files. Now you can take advantage of in-product compatibility with MS Office Mac 2011 and iWork 09.
- More export types let you export your map or slides in a variety of formats.
- Now you can easily import your FreeMind maps into MindManager.

Improved Filtering and Select

- Filtering and selecting map elements is more intuitive with helpful tool tips, and easier creation and use of saved rules.

Quick Entry Mode

- Quickly enter and organize ideas into a map for an improved brainstorming and mapping experience.

Improved Imagery, Styles and Templates

- Choose from a selection of new business-oriented icons, images, templates and styles designed to enhance presentations and provide more context to maps.

Issue: Export corrupts non-Roman title (i.e. Japanese title) of map causes system error when trying to open it.

Resolved: Exports non-Roman titles normally.

Issue: Footer doesn’t export properly to MS Word.

Resolved: Footer exports normally.

Known Issues in Version 9.5.416

Issue: Some users may experience a problem seeing current Help content due to a quirk in the Apple Help Viewer. The problem is caused when the Help Viewer cache is not updated with the latest content. Symptoms you may experience:

- After upgrading to MindManager 9.5 you are still seeing MindManager 9.0 Help content
- You get a “Help topic unavailable” message from the Help Viewer when using the MindManager help.
- MindManager Help displays in the wrong language after you switch your system to a different language.

Workaround: To overcome this problem, we are making a script available that will clear the Help Viewer cache.

1. Go to the Mindjet Community for MindManager for Mac at http://community.mindjet.com/mindjet/products/mindjet_mindmanager_v_9_for_mac .
2. On the right side of the screen, in the list of links, click “How to clear the Help Viewer cache” .
3. The PDF with instructions and a link to the script will download.

Issue: Cannot open Notes or Slides pane in Map View unless you select from Menu bar.

Workaround: Select from Menu bar.

Issue: Notes positioned on bottom open empty and without formatting toolbar.

Workaround: Position Notes pane on the right.

Issue: Notes pane does not hide when in Slide Show mode.

Workaround: Close Notes pane before entering Slide Show mode, and do not open Notes while in Slide Show mode.

Issue: Error upon exporting templates.

Workaround: Edit template and save with a unique file name (not with template’s given name).

Issue: JA, DE, FR: Bottom navigation controls disappear in Slideshow after first launch of Slideshow.

Workaround: Use ESC key to exit and Up-Down keyboard controls to control Slideshow.

Issue: Cannot access map when exiting Slideshow with a map that contains Notes and Slides.

Workaround: Do not open Notes while in Slideshow mode.

Issue: Save window doesn’t remember previous save location for new export.

Workaround: Use drop down menu for “Recent Places” (OS option for shortcut to last used folder).

Issue: Keyboard shortcuts use Up-Down arrows to flip through Slideshow, not Left-Right arrows.

Workaround: None.

Issue: Cursor remains visible during Slideshow when using keyboard shortcuts.

Workaround: Pull cursor out of sight when presenting via Slideshow.

Issue: If map is filtered, exiting from Slideshow removes Filter.

Workaround: None.

Issue: Files exported without extension.

Workaround: None.

Issue: Relationship shape is truncated in slide thumbnail.

Workaround: None.

Issue: Same output result when selecting export option for image “Export current map view” or “Export each slide as a separate image.”

Workaround: None.

Issue: Delete topic that is also a slide in map produces unexpected results (slide gets moved to Central topic).

Workaround: Remove slide from topic, then delete topic.

Issue: No <New Slide> option in application’s Menu bar.

Workaround: Select desired topics and click <+> in Slides view, or <Ctrl-Click> and select “New Slide from Topic” from contextual menu.

Issue: <Shift-Click> to select range of topics at once isn't supported.

Workaround: Rubber band selects all desired topics.

Issue: Hyperlink doesn't open topic in another map properly when "Absolute Hyperlink" checkbox is checked.

Workaround: None.
